

Design any label with Brady Workstation apps

Brady Workstation offers professional, intuitive apps to design quality product and cable labels and safety signs. Label design becomes easier, faster and quickly adaptable to new label norms thanks to centralised updates.

SELECT THE APPS YOU NEED

Simply select the apps you need, download the 30-day trial and purchase when satisfied. Available product, cable, safety and facility identification apps enable you to:

- design and edit custom labels and signs
- design label templates and lock elements for consistency
- create text-only cable labels
- automate label creation
- easily import data
- easily set up complex label sequences
- easily design CLP-chemical labels
- print lockout procedures, tags and energy source labels
- design safety and facility signs.

AVAILABLE IN MULTIPLE LANGUAGES

Brady Workstation apps are available in 20 languages, including English, French, German, Russian, Spanish, Italian, Polish and Dutch. Select your language before downloading from the drop down menu.

EASILY CONNECT TO YOUR PRINTER

Brady Workstation works seamlessly with a range of Brady desktop and portable printers. Brady's high-end label printers also offer bi-directional communication with Brady Workstation and will inform users if they have to switch label materials to print specific label designs. Printer compatibility is shown in Brady Workstation on an app by app basis.

BRADY - YOUR COMPLETE WORK SAFETY SOLUTION PROVIDER

Find out more safety products from our extensive portfolio. Visit www.bradyeurope.com or contact your nearest Brady Distributor.

DO-IT-YOURSELF SIGN MAKING

Brady offers a full range of printer solutions to make your own Safety Signs. Choose from a variety of capabilities and options to provide high quality, cost-effective printing on a complete line of labelling materials.

INDUSTRIAL, ELECTRONIC & ELECTRICAL IDENTIFICATION

Our world-class label series are engineered to be long-lasting, withstand the harshest environments and work for a variety of applications. When it comes to identifying and tracking products, equipment and components, Brady is the company you trust when performance matters most.

SAFETY SIGNS - IMPORTANT INFORMATION AT THE POINT OF NEED

We offer more than 8,000 different signs for safety, maintenance and facility identification.

- Designed to withstand even the harshest industrial environments
- Bright colours, bold text and intuitive pictograms
- Compliant with the latest standards and regulations
- Highly visible and easy to understand communication

Simply download Brady Workstation to your desktop and add the applications you need: www.workstation.bradyid.com

APPS FOR PRODUCT, CABLE & WIRE, AND SAFETY LABEL & SIGN DESIGN

Design custom labels and signs, edit label templates and plug in extra tools to gain efficiency with high value, multifunctional apps.

Application	Description	Availability
Print Partner	Save time, reduce errors and establish label consistency with the Print Partner app. Non-editable fields keep label layouts and information safe, while users can easily enter data into variable fields and then print. This app works with both Brady Workstation and LabelMark templates.	PAID
Manage Files	Need to see and organise your label files from all of your apps in one place? The Manage Files app lets you manage all of your saved files from one screen, with options to preview, categorise and delete your files without going into each app separately.	FREE
Label Settings	Save time and reduce errors by setting default horizontal and vertical printing adjustments when using specific label supplies with a specific printer. The Label Settings app also allows you to define custom label supplies for use with Brady Workstation, similar to the "Custom Parts" feature in LabelMark.	FREE
Batch Print	The Batch Print app is your one-stop shop for grouping files to print together. By batching similar files together to print as one job, you can save ribbon and tape materials. And if you need to print the same files again and again, you can save your jobs for faster reprints.	FREE
Sequence	With the Sequence add-on module, you can create a separate label for each value in a numeric or alphanumeric sequence. The sequence is defined by setting the starting number, total number of labels and increment interval. It works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.	FREE
Excel Import	The Excel Import add-on module lets you import Excel data onto your labels, creating a separate label for each row in your spreadsheet. It supports both .xls and .xlsx formats, and works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.	FREE
Template Editor	For more consistent, accurate labels, the Template Editor add-on module available in Custom Designer, Custom Designer Lite and Text Labels editor apps allows you to set elements on your labels to be editable or locked. Once completed, your finished templates can be used in Print Partner or Data Automation apps to easily enter data onto your labels.	PAID
Advanced Sequence	Define a sequence with multiple counters and create a separate label for each value in the sequence with the Advanced Sequence add-on module. You can set each counter to increment independently or after a different counter has finished. It works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.	PAID
Advanced Import	When you need data-import capabilities beyond Excel, use the Advanced Import add-on module. It creates a separate label for each item in the source data imported from CSV, TXT, Excel, MS Access, OLE DB and SQL. In addition, you can filter and sort, edit your SQL query and select individual records to import. This module works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.	PAID
Custom Designer Lite	When all you need is a simple label editor to add text, bar codes, graphics and shapes to your labels, Custom Designer Lite is the ideal tool. This "no frills" label editing app also lets you customise labels created in any other Brady Workstation app.	FREE
Custom Designer	When you need full label creation capabilities to streamline your work and maximise your investment, Custom Designer is the app of choice. This premier label editing app includes all of the features of Custom Designer Lite, plus more barcodes, linked objects, label error checking, subscript/superscript, advanced editing tools and more. It also opens saved "graphics mode" files from LabelMark 5 and 6 without the need to convert.	PAID
Print Ruler	Print a simple ruler that you can apply when and where you need it. *Brady Labs are experimental apps or features not ready for full release. Test them out for us, then let us know what you think!	FREE

APPS FOR PRODUCT, AND CABLE & WIRE LABEL DESIGN

Quickly design text only label, automate label data imports, or switch from horizontal to vertical label data alignment with practical apps for product and cable label design.

Application	Description	Availability
LabelMark 4 Converter	Do you have LabelMark 4 files? The LabelMark 4 Converter does just what it says: converts your files for use in Brady Workstation. You can convert a single file or all files in a single folder at once. (You do NOT need this utility for files from LabelMark 5 or 6, as these files can be opened directly within Custom Designer, Custom Designer Pro or Text Labels without needing to convert them.)	FREE
Data Automation	Save time and reduce errors with Data Automation. By automatically importing data into a pre-defined label template and printing to a designated printer, this app allows label printing to become a part of your daily processes seamlessly. It runs in the background so you won't have to interrupt your work just to print a label.	PAID
Flip Flop	Automatically swap text items horizontally or vertically on your labels with the Flip Flop add-on module. This is especially useful for DataCom applications when you just need to reorder your data. It works with Custom Designer, Custom Designer Lite and Text Labels apps.	PAID
Text Labels	When you need just a few lines of text for a wire or cable marker, the Text Labels app provides a simple, streamlined experience. It enables you to enter text easily and shows you how many lines of text will fit onto your label. If you have saved "line mode" files from LabelMark 5 and 6, this app fully supports opening them, with no conversion required.	PAID

APPS FOR SAFETY LABEL & SIGN DESIGN

Easily design safety signs, pipe markers, Lockout/Tagout procedures, arc flash labels and CLP-labels with intuitive apps for safety sign and label design.

Application	Description	Availability
CLP (GHS)	Creating chemical labels that meet European CLP requirements just got simpler. After you've entered the data from your SDS once, you can quickly and easily create any sized CLP label at any time. Need bilingual labels? Those are also supported in the app.	PAID
GHS Labels	Creating GHS labels is now amazingly simple. We've streamlined the process so you can easily enter the data from your SDS sheets once, then create and print any size GHS label at any time. Need bilingual labels? Those are also supported in the app.	PAID
Lockout Writer	Save time and keep employees safe with the Lockout Writer app. This intuitive tool allows you to create, store and print simple lockout procedures, the associated tags and energy source labels quickly and easily.	PAID
Pipemarker (CLP)	When you need the pipe markers to comply with the CLP European pipe marker standards, Pipe Marker (CLP) is your solution. Utilising pre-defined templates and layouts, this app allows you to create the customised pipe markers you need to meet the specific requirements established for your country.	PAID
Pipemarker (CLP-Rollform)	For times when you need a CLP-compliant pipe marker that also wraps around your pipe, use the Pipe Marker (CLP-Rollform) app. With this app and its pre-defined templates, you can create the customised pipe markers you need using a roll-form layout to wrap around your pipe.	PAID
Arrow Tape	Beyond creating a compliant pipe marker, you need to know which direction the pipe contents are flowing in. The Arrow Tape app uses pre-defined templates and layouts to help you create a strip of repeating arrows or icons to wrap around your pipe, showing content direction.	PAID
Express Signs	Create your signs in no time! With the Express Signs app, simply pick a template, enter your information and print it in minutes. Want to try a different look? With just a single click, you can pick another layout – and don't worry, the sign information you entered will stay the same.	PAID
Arc Flash	Quickly and easily create NFPA-compliant arc flash labels with the Arc Flash app. Enter or import the assessment data for your equipment, then use the built-in templates to create and print your labels with a few simple clicks. This includes the latest 2015 updates to the NFPA 70E standard.	FREE

LABEL & SIGN CREATION SUITES

Every Brady Workstation app can be downloaded, tested and purchased separately. Additionally, Brady Workstation also includes several label design suites that combine apps frequently used to create product identification labels, cable identification labels, safety signs and labels, or to set up automatic label creation processes.
